

## Big Woods, Big Leaves Nature Exploration

| Name: |  |
|-------|--|
|       |  |

Explore the **deciduous forest biome** of Minnesota through examining specimens of plants and animals!

## Vocabulary

**Deciduous Forest:** A forest in which trees lose their leaves during autumn.

**Biome:** A large community of plants and animals defined by environmental conditions

**Specimen:** An animal, mineral, or plant that is used for research or study

Minnesota's Deciduous Forest biome runs through the middle of the state.

## Activity

Find an animal **specimen** that lives in the deciduous forest, then answer the questions in each box.

| Observe the Specimen                              |  |  |
|---|--|--|
| What do you notice about it? (Color, shape, Size) |  |  |
|   |  |  |
|   |  |  |
|   |  |  |
|   |  |  |
|   |  |  |
|   |  |  |
|   |  |  |
| Create a Diagram                                  |  |  |
|   |  |  |
